USER MANUAL FOR JAVA

Section 3
Recharging and updating TAAC

Copyright 2011 - All rights reserved.

Introduction

This manual is intended to all users of mobile phones supporting Java applications.
The mobile phones supporting Java are the vast majority of all mobile phones out there, including for example Nokia, Samsung, Motorola, SonyEricsson and LG.
A quick trick to know if your phone is among the supported models is to see if there are games installed on the phone. While opening a game you will most likely see a small coffee cup symbol with "java" written with it. If you come across this icon, it is most likely that your phone supports Java. Make sure that your phone also has the access to Internet. If you still doubt the compatibility of your mobile device, please see the complete list of all supported brands and models on our web page www.taac-sms.com.

If you have a BlackBerry device, see the User Manual for Blackberry.

Index

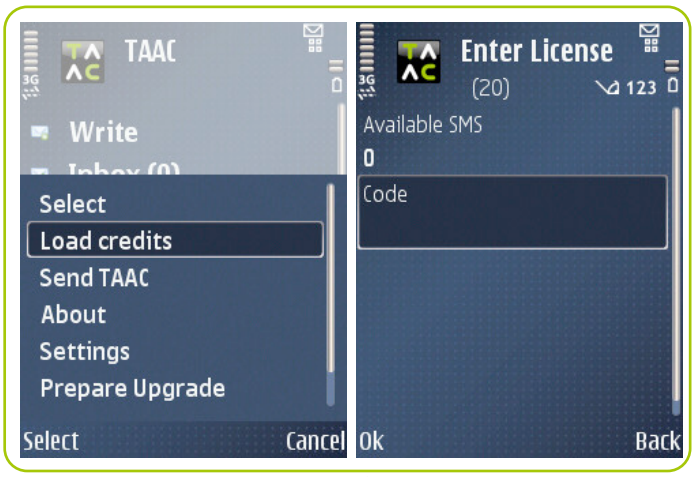
1. Check the amount of available credits
2. Recharge TAAC credits
3. Upgrade TAAC

1. Check the amount of available credits

TAAC functions with a system of rechargeable credits. Every encrypted message will use one credit. From the installation process you will have some free credits.

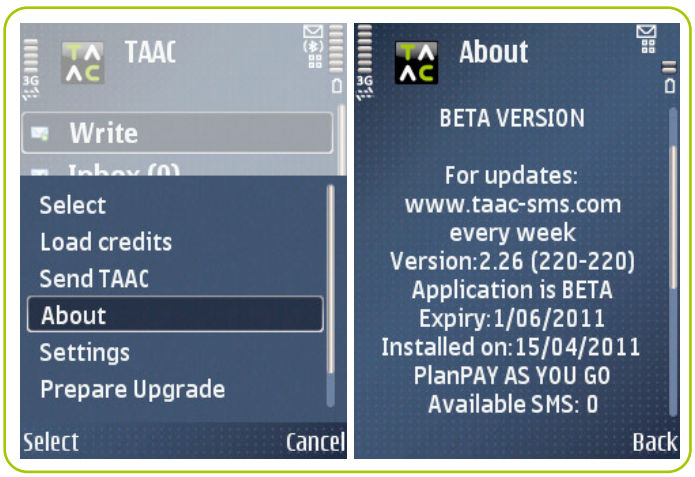
Finding out how many credits are still available

With TAAC you can use two different kinds of licenses; by credits or by time period.
License by credits: Every sent secure SMS will use one credit;
License by time period: You can send limitless amount of secure messages during the time period in use.
The invites and the activation messages do not use any credits. Nor do the received secure messages.
The licenses do not include the cost of sending a SMS via telephone operators.



1. Select Recharge credits from the main option menu.
2. Read how many credits you still have available for use, or instead the date when the time period license is expiring. In case of time period license, one can send limitless amount of messages to the expiring date.

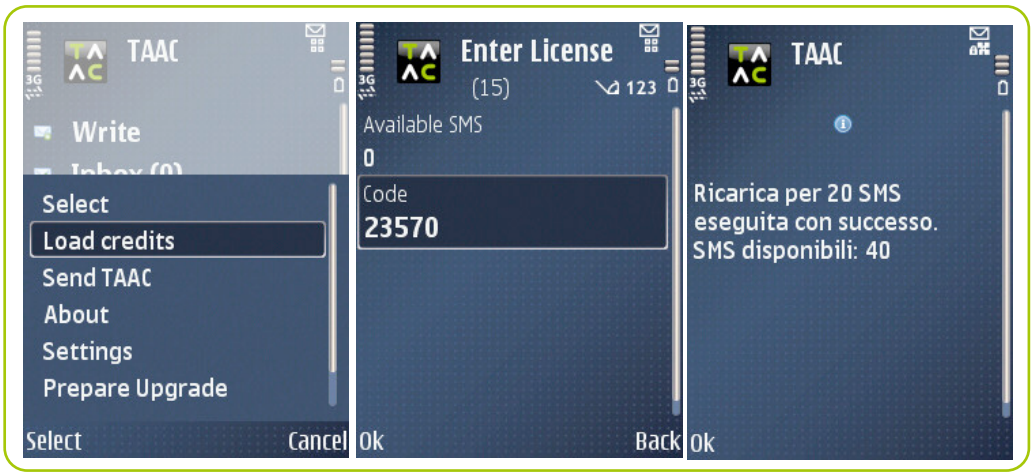
OR



1. Select About from the main option menu.
2. Read the number of available credits or the expiration date of the time period license.

2. Recharge TAAC credits

When the credits are finished or the time period ended, you need to recharge more credits or another time period with a recharge code.
You can choose the most suitable deal from a diverse range of recharge licenses.

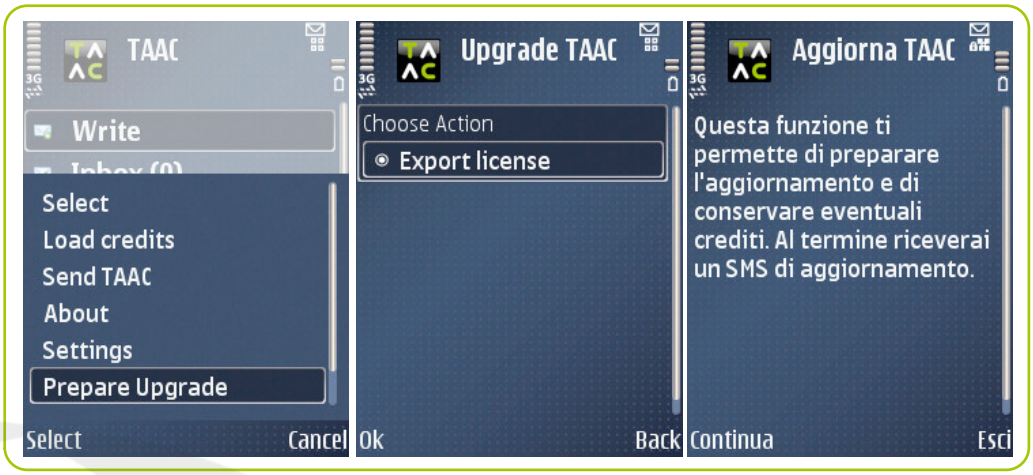


1. Select Recharge credits from the main options menu.
2. Insert the recharge code you have acquired.
3. Press OK. In few seconds you will receive a confirmation SMS with the number of recharged credits or the time limit for a time period license.

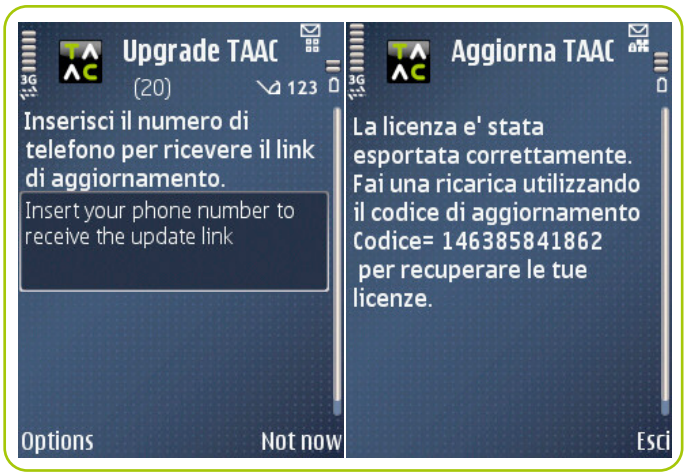
3. Upgrade TAAC

When a new version of TAAC will be released, you can easily upgrade your application. To do so you can choose Upgrade TAAC from the main options menu. With the internal system for upgrading process you can save your license with credits or time period, so that you can safely upgrade the application to the new version without the risk of losing credits. The new version will be sent to your phone in form of a SMS containing the link for download.

Saving the license



1. Click Upgrade TAAC from the options menu.
2. Click Save license to save the recharges you have made.



Upgrade TAAC

Aggiorna TAAC
La licenza e' stata esportata correttamente. Fai una ricarica utilizzando il codice di aggiornamento Codice= 146385841862 per recuperare le tue licenze.
Esci

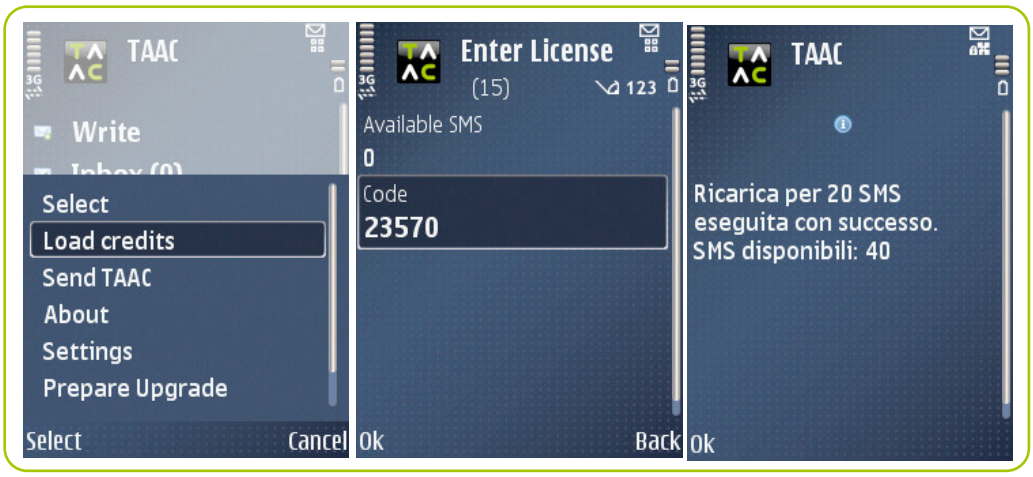
3. Insert your phone number when asked, and press Continue.
4. Write down (on a paper) the Secret code that will be shown to you. You will have to use this code to regain your credits after the upgrading process. You will get the code only if there is a valid license to save, otherwise this process will be skipped. You will receive this code also in the messages you receive from TAAC. Write it down BEFORE upgrading the application.

This way your licenses will be saved in the TAAC system. You can regain the licenses in any moment you wish after upgrading the application, they will remain saved.

Install the new version

1. Exit from TAAC and wait for the SMS for upgrading.
2. Click the link in the upgrading message you have received.
3. Follow the instructions you are shown on the screen.
4. Enter TAAC by inserting the PIN code you have set in the beginning of use.

Importing the license



1. Click Recharge credits from the options menu
2. Insert the secret code you wrote on a paper before upgrading.
3. Wait for a confirmation message that will arrive in the inbox of TAAC.
4. Open the SMS to re-establish the saved license.

www.taac-sms.com

The development team of TAAC wants to be close to everyone using the application. To this close communication wish TAAC has developed a special newsletter and an address where anyone can report a possible problem that has been encountered, suggest new features for the application or simply ask questions.

sos@taac-sms.com

Write us from any address to request technical support.

feedback@taac-sms.com

Write here to give us suggestions about the application. We would be happy to receive your guidance and your recommendations so that we can develop ourselves towards ever increasing quality of product and service.
